

**FY 2016 JEPIC Seminar in Myanmar on
“Design, Operation and Maintenance for Distribution Facilities and Technique
related to Distribution System”**

JEPIC has been conducting bilateral seminar programs with electric utilities in ASEAN countries with strong support from electric power companies in Japan. The purpose of the program is to strengthen the business infrastructure of the electric utilities in ASEAN countries, such as basic and expertise technologies, management and human resources development.

JEPIC and Ministry of Electricity and Energy (“MOEE”; MOEP and MOE was formed together into MOEE on April, 2016) launched their bilateral cooperation programs in 2005. Since the initiation, JEPIC and MOEE have held seminars every year in Japan as well as in Myanmar.

In cooperation with Hokuriku Electric Power Company and Chubu Electric Power Co., Inc., JEPIC and MOEE held the 12nd Seminar in Myanmar from the end of February to the beginning of March 2017 as below;

Date of the Seminar	: February 27 th to March 1 st , 2017
Seminar Place	: Naypyidaw, Myanmar
Theme of the Seminar	: Design, Operation and Maintenance for Distribution Facilities and Technique related to Distribution System
Participants	: 50 participants from MOEE
Mission Members	: 2 experts from Hokuriku Electric Power Company 2 experts from Chubu Electric Power Co., Inc. 3 secretaries from JEPIC (including head of delegation)

50 MOEE participants attended the Seminar. After the presentation, we had a fruitful discussion and shared opinions as to Design, Operation and Maintenance for Distribution Facilities and Distribution System.
